

Health & Safety Alert #2-05-08

Keeping Safe in the Summer Part I

SUMMER SUN MEANS FUN BUT

FOOD POISONING

Those great picnics in the sun can be the cause of a trip to the hospital because of food that is eaten. Be sure to refrigerate all food; don't let any of it sit in the sun! **Use the two-hour rule – Discard food that has been left out of a refrigerator or well-chilled ice chest longer than two hours.** Your Mother was right – wash your hands! Be sure food is served on clean plates and use clean utensils. Cover your food; insects can spread diseases. **Remember: "When in doubt, throw it out!"**

CREEPY CRAWLERS & FLYING CRITTERS

Bees, wasps & hornets can cause medical emergencies if they sting – **know whether anyone is allergic and be prepared ~ know the protocol that must be followed!** For everyone else, it is important to remove the stinger promptly. Use a flat edge, such as a credit card, to scrape it from the place it is imbedded. Wash and apply ice. **Deer ticks** are tiny insects that live in low brush and can spread Lyme disease. Be sure to use insect repellent with DEET in it (the higher the amount, the more protection) when out and about. If a tick becomes attached – get medical help immediately! Usually, a Lyme disease carrying tick has to be attached for at least 24 hours to spread the disease.

WEST NILE VIRUS

West Nile Virus (WNV) was first diagnosed in 1999 in New York City and has since spread across the country more quickly than expected. It is primarily a disease of birds. It grows inside an infected bird and is spread to other birds, animals, and people through mosquito bites. Be sure to use insect repellent with DEET in it, when out and about. Spray not only exposed areas, but clothing also. Wearing long sleeved clothing and pants help protect the person. **Hint: If the mosquitoes are chasing you, use insect spray and wear light clothing – mosquitoes prefer dark colors.**

WATER SAFETY RULES

- Assess each individual's capabilities and needs for different water areas, such as pools, rivers, or the ocean.
- Assess staff's capabilities in responding to water safety needs.
- Someone should always be designated as a "life guard" to keep watch for any problems.
- Do not chew gum or eat while swimming as you could easily choke.
- Use caution when swimming after a large meal.
- Make sure the person you are supporting is using an approved life jacket or other flotation device if needed.
- **Watch out for the "Dangerous TOO's"** ~ TOO tired, TOO cold, TOO far from safety, TOO much sun, TOO much strenuous activity.

SUMMER CAMPS

Proper planning is important when individuals are attending camp. The following steps may assist with ensuring an enjoyable experience:

- Be familiar with the camp and possible dangers for the individual(s) attending.
- Know who will be supervising the individual and what experience they have. Be sure you are comfortable with what will be occurring.
- Communicate face-to-face with the camp director on any dietary requirement, supervision requirements, medical needs, or behavior issues. Provide a written copy of the information needed (e.g. ISP, Behavior Plan, etc.).
- Be sure lotion for sunburn and bug bites is provided or available. Be aware of any medications that increase a person's sensitivity to the sun and communicate this to the camp staff.
- If there is a pond, lake, or pool discuss the individual's abilities in the water with the camp director and any special needs that exist. Provide a written copy of those needs.
- Be aware of the camp activities and how they match with the individual's physical or health needs.

BAREFOOT/SANDALS

- Be mindful of potential injuries when going barefoot or wearing sandals

OUTDOOR GRILLS

Outdoor grills can result in burns if proper safety requirements and supervision are not provided and followed.

- Be sure lid is open before lighting a gas grill.
- Don't squeeze extra fire starter on coals when they are already burning.
- Check grills for proper working order.
- Supervise individuals closely when grilling.
