# THE OHIO DEPARTMENT OF MRDD

Your Monthly Update For Individual Information Form (IIF) and Individual Data System (IDS) News!

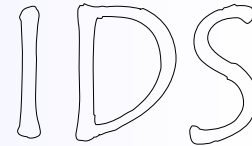

## Individual Data System (IDS) e-Bulletin

### IDS Data—CONVERSION PROCESS

Issue 12—June 2009

The IDS is scheduled to go live in mid-July. Prior to its unveiling, we will be mapping old IIF data into it's new IDS field equivalent. An e-mail will be sent to all IIF/IDS Coordinators and vendors in the upcoming weeks with a crosswalk of all old-to-new fields and a list of obsolete fields that will be stored as history. This will help you in determining which fields you may want to update prior to the conversion to ensure the best data possible in the new IDS.

Also note that **we will use this data to pull our NCI sample** for the FY2010 year so "cleaning" your data is highly recommended!

For copies of the IDS screenshots, the data conversion document and/or the xml schema, contact Leslie Minnich at [leslie.minnich@dmr.state.oh.us](mailto:leslie.minnich@dmr.state.oh.us)

### NOTICE OF MEETING—Iteration #9 Review

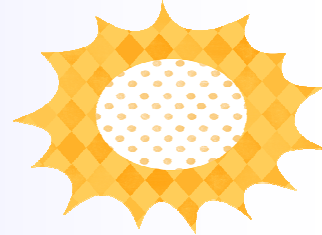

**ITERATION 9  
WEB  
CONFERENCE  
OR IN-PERSON  
MEETING  
SCHEDULED FOR  
JULY 17, 2009.**

**JULY 17, 2009  
10:30AM—12:00PM**

**Attend via web conference at:**  
[http://Roosevelt.eteach.ohio.gov:80/join\\_meeting.html?meetingId=1245859977238](http://Roosevelt.eteach.ohio.gov:80/join_meeting.html?meetingId=1245859977238)

**Or in person at;**  
Rhodes State Office Tower  
30 E Broad St—12th Floor  
Columbus OH 43215

### Newsletter Spotlight

**HAPPY SUMMER!**

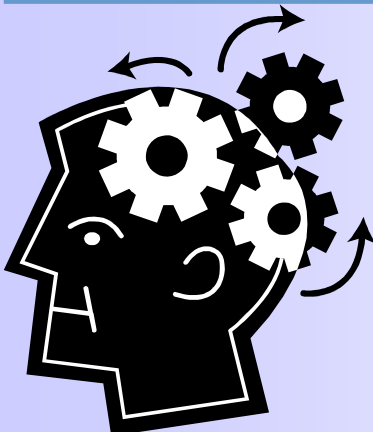

### IDS Security—ACCESS AND ROLES

Because the new Individual Data System is designed in a way that houses several data applications in one place, some security access/user roles must be updated or changed to accommodate this new design. Here are a few of the details;

1. Users who have any access to AAI, ODDP, PTS, and WL will continue to have the same access/role as they currently have. But all will be granted a role called IDS\_Read because this will become the new way to get to these applications.
2. Former IIF user roles/access will be changing. New access/roles will include IDS\_Read, IDS\_Edit, and IDS\_Create.

**Watch for an IDS e-Bulletin EXTRA in your e-mailbox that outlines all of the roles mentioned above in detail and includes directions for users to update if applicable.**

### THE XML SCHEMA—New for IDS

The ODMRDD continues to work on the IDS application with implementation scheduled for mid-July. The new application continues to make use of the XML data upload feature and will be sent as an attachment to the **IDS e-Bulletin EXTRA** coming soon!

**NOTE\*** ODMRDD is currently working with several vendors on a web services model as it is anticipated that *in the future*, the XML upload will be replaced (with a web services model) as a Phase 2—maintenance release of IDS.
